Jakarta, Indonesia

Experienced Front End Engineer with over 3 years of expertise in architecting high-performance, industrial-grade web applications. I specialize in the React ecosystem, leveraging Next.js and TypeScript to build scalable systems that adhere to Clean Architecture principles. My strength lies in optimizing complex data-driven interfaces through advanced server-state management with TanStack Query and modular state handling with Zustand. With a strong focus on system reliability, I implement rigorous schema validation using Zod to deliver type-safe, maintainable, and efficient user experiences.

Work Experiences

Wings Group Indonesia (Sayap Mas Utama) - Jakarta, Indonesia

Sep 2025 - Present

Front End Engineer

Wings Group Indonesia is a leading FMCG company founded in 1948, producing household, personal care, and food products known for quality and affordability. The company operates nationwide and exports to many countries.

- Architected and implemented a centralized Master Data Governance (MDG) module within a satellite application ecosystem, seamlessly integrated with SAP to ensure data synchronization across enterprise-wide systems.
- Engineered complex data transformation layers to bridge frontend inputs with SAP's rigid data structures, maintaining high data integrity and reducing sync errors.
- Developed a standardized and highly reusable UI component library using Material UI (MUI), ensuring design consistency and significantly reducing development time for new internal modules.
- Engineered an efficient global state management architecture using Zustand, facilitating seamless data flow and improving application performance across intricate governance forms.
- Optimized server-side data fetching and caching through TanStack Query, ensuring high availability of master data records while minimizing server overhead during heavy SAP-integrated workloads.

PT Synapsis Sinergi Digital - Jakarta, Indonesia

Feb 2023 - Aug 2025

Front End Engineer

Synapsis.id is an Indonesian tech startup established in 2019, focused on delivering IoT-based solutions for operational efficiency and data-driven decision-making.

- Developed and maintained a comprehensive Workshop Monitoring System using JavaScript, focusing on tracking equipment maintenance cycles and workshop throughput for industrial operations.
- Architected and developed a mission-critical Fleet Management System (FMS), enabling real-time tracking and productivity analysis through a modern Next.js and TypeScript stack.
- Engineered an interactive geospatial dashboard using Leaflet.js, implementing real-time vehicle movement tracking, geofencing, and dynamic map markers to visualize complex mining site logistics.
- Optimized map rendering performance by managing high-frequency data streams for vehicle coordinates, ensuring smooth and accurate real-time updates without compromising browser responsiveness.
- Engineered a robust server-state management strategy using TanStack Query, significantly reducing redundant API requests and ensuring low-latency data updates for real-time industrial dashboards.
- Optimized application performance and reliability by integrating Zod for rigorous schema validation, effectively eliminating runtime errors during complex data-fetching processes.

PT Ciptadra Softindo - Depok, Indonesia

Jun 2022 - Dec 2022

Software Engineer

Ciptadra Softindo is a creative engineering company established in 1999, with extensive experience delivering innovative solutions for national and multinational clients across various industries. Based in Depok, the company employs over 80 professionals and has completed hundreds of successful projects.

- Developed a CRM web application called OneBox, designed to streamline customer relationship management processes for internal use.
- Built using Phalcon PHP framework with a PostgreSQL database for efficient backend performance and scalability.
- Collaborated with the design team using Figma to translate UI/UX designs into responsive, user-friendly interfaces.
- Contributed to both frontend and backend development, ensuring seamless integration between the system's components.

Education Level

Universitas Gunadarma - Depok, Indonesia

Sep 2018 - Sep 2022

Bachelor Technical Information, 3.38/4.00

- Make a scientific research about AR with the title "Pembuatan Aplikasi Pengenalan Motif Batik Daerah di Provinsi Jawa Tengah dengan Augmented Reality Berbasis Android".

Organisational Experience

The Sounds Project - Jakarta, Indonesia

Feb 2020 - Apr 2020

Volunteer

- Promote event on social media and helping to selling the ticket with creative way.

Skills, Achievements & Other Experience

- **Soft Skills:** Good Communication, Team Work, Hard Working, Adaptive, Time Management, Technical Problem Solving, Cross-functional Collaboration, and Code Review & Maintainability
- **Core Frontend & Frameworks:** Next.js, React.js (Hooks, Context API), TypeScript, JavaScript (ES6+), PHP.
- **State & Data Management:** TanStack Query (React Query), Zustand, Zod (Schema Validation), Context API.
- **Styling & UI Systems:** Tailwind CSS (v4), Material UI (MUI), Ant Design, shadcn/ui, Responsive Web Design.
- **Architecture & Methodology:** Clean Architecture, Domain-Driven Design (DDD), Component-Driven Development, RESTful API Integration.
- **Tools & Ecosystem:** Git, pnpm, Webpack, Vite, Figma (Design-to-Code), Postman.
- **Specialized Integrations:** Leaflet.js (Geospatial Data), SAP Integration, IoT Dashboarding, Real-time Data Synchronization.
- **Achievements (2022):** Belajar Dasar Programming Web, Dicoding
- **Achievements (2022):** Certificate of Competencies - Investree Fullstack Virtual Internship Experience Program, Investree
- **Achievements (2022):** Certificate of Completion - Investree Fullstack Virtual Internship Experience Program, Investree
